For EMS program directors: free NREMT practice next to your EMR, EMT, AEMT or Paramedic course.

Know who's ready for the NREMT before they book it.

Students practice free in EMT Ticket on a phone or laptop and join your class board with a 6-letter code. Each week you assign the test-plan domain for the module you're teaching; the board shows who did it, what the class misses most, and each student's Pass Meter: their chance of passing a practice test built like the real exam.

What students get

1,006	1,206	600	905
EMR	EMT	AEMT	Paramedic

- Built to the current NREMT test plans. EMR and EMT questions are tagged to the 28 job tasks; AEMT and Paramedic follow their six domains, about a third in Clinical Judgment scenarios.
- Written from the NHTSA EMS education standards and the 2019 National EMS Scope of Practice Model; CPR numbers from the current AHA guidelines.
- Practice tests split by the exam's domain weights, a review sheet of misses, and a radio report trainer.

What the board shows you

- Each student's **Pass Meter**, score by domain, last study day and practice tests. **READY** at 90%.
- **Teach next:** the topics the class gets right least often.
- **Assignment progress:** who finished this week's questions.
- A cohort snapshot you can print at the start, middle and end of a course, or download as a CSV.
- Real NREMT results students choose to report, counted once each.

Privacy: no student accounts, emails or ID numbers; students join with a first name. The board never sees answers to single questions, and a student can leave at any time, which deletes their rows.

Covers the written (cognitive) exam. Skills stay in your lab.

The plan, module by module (EMT)

Module	Assign these domains	Checkpoint
Preparatory	Operations; Scene Size-up and Safety	Study days, not scores.
Patient assessment	Scene Size-up and Safety; Primary and Secondary Assessment	Weak topics after the module exam.
Airway and pharmacology	Primary Assessment; Patient Treatment and Transport	Teach next, before each exam.
Medical; shock and resuscitation	Secondary and Primary Assessment; Patient Treatment and Transport	First full practice test.
Trauma; special populations	Patient Treatment and Transport; Secondary Assessment	Pass Meter trend.
EMS operations	Scene Size-up and Safety; Operations	Weak job tasks.
Before the NREMT	Full 70-question practice tests	READY: 90% and a passed test.

AEMT and Paramedic: assign their six domains with the matching course block, and Clinical Judgment from the first patient-care block on. The full plan, syllabus wording and privacy details: headedin.com/class/ems.

What it costs

Free board
$0
Up to 10 students. Studying is always free.

School plan
$5 a student a month
Only the months your class runs. Invoiced to the school.

Whole program
$299 a year
Up to 100 students. EMR through Paramedic count as one program.

With Hall Monitor
Ask us
Add RN-reviewed checks of your own exam questions, on the same invoice.

On a school plan, every practice test is free for every student on the board; students never pay. Pilot programs: one class free in exchange for the class's real pass/fail counts at the end (counts only, no names).

Start a board free today.

It takes about a minute, with no account. Or write to us for a school plan, a pilot class or an invoice.
